High-capacity, labor-saving slings.

You can lift virtually any size boat with our Boat Lifting Slings, engineered to offer labor-saving convenience with all types of overhead lifting devices. Choose from one- or two-ply construction in webbing widths from

2" to 12" to give you rated capacities ranging from 4,800 lbs. to 53,800 lbs. per sling. When rigged in basket hitches, pairs of standard slings can lift up to 53 tons per pair. If you need even more capability than that, you may rig additional slings or pairs in your lift.

Warning: Horizontal sling angles less than 30° shall not be used.

Fittings and accessories for boat slings.

Loose pin hardware allows in-field removal for use on other slings or on additional eyes for different sized boats.

Reusable alloy steel triangle is a permanent end fitting that slides easily onto the lifting hook.

Extra sewn eyes allow lifting of different sized boats with one set of slings. Single-ply capacity only.

Disconnect lets you remove sling from beneath the boat without removing sling eye from hook. Protective flap standard.

Sliding chine and keel pads permit positioning padding at any point to prevent rubbing on hull and protect sling from sharp corners.

Lead weights help keep sling from twisting and also serve as anchor for sling in water. Can be sewn into keel pad. Fixed or sliding options.

Edge guard wear pads can protect sling's edges and extend its useful life. Can be sewn on any portion of sling.

NOTE: For loose-pin hardware (shackles) on 2-ply slings made with 8", 10" or 12" webbing, please check with your distributor, distribution center or factory.
